Catalan: basic

PROJECTS

Arxiu Search | React, Zustand and Tailwind

Do you have to find a census book of the city of Barcelona after 1930? This app can help you, just go in and filter by street, district or year!

https://github.com/LilaSarfson/project_arxiu

Freeway | Vue.js, CSS, Java, SpringBoot, MySQL

App to organize trips. Includes own database with user management

<https://github.com/PlanificacionViaje>

Pick your seat | Vue.js, Vuex and Tailwind

A seat selection screen for buying movie theater tickets. It includes data management and pricing based on the movie and the number of users.

<https://github.com/LilaSarfson/cinematest>

Ati Project | React and Tailwind

Simulation of a machine control panel screen. Includes rendering of values through components extracted from DevExtreme.

<https://github.com/LilaSarfson/atiproject>

Cine de Barrio | Vue.js and CSS

Mini game based on guessing typical Spanish movies from the 60s. Includes state management and external API consumption.

<https://github.com/Singulars2022/cinedebarrio>
